Lancaster Farming

VOL. 7 NO. 48 5-1 | Lancaster Farming, Saturday, November 3, 1962 | $2 Per Year

UNDAUNTED BY THE RAIN OUTSIDE, Governor David Lawrence goes through ground breaking ceremonies in the main exhibition arena of the Farm Show Building while Dr. William L Henning, Secretary of Agriculture looks on. Ceremonies signaling the start on the new $2 9 million Department of Agriculture office and laboratory building were moved inside the building when rain turned the site of the proposed building to mud. A wheelbarrow of soil from the site was hauled in, dumped by the Governor and Secretary, and dutifully "broken" by the smiling Governor.

Indoor Ground Breaking Calls For Some Ingenuity

Neither rain, nor wind, nor gloomy day could long stay the swift completion of the ground breaking ceremonies planned by the Pennsylvania State Department of Agriculture this week

When the scheduled ground breaking ceremonies threatened to become a "mud busting" spectacle the whole event, soil and all, was moved indoors

This posed some problems but the indomitable dirt farmers in the Department of Agriculture were not to be outdone

When rain began to fall, the decision to move the ground breaking ceremonies for the new department building into the arena of the Farm Show Building ran into another snag The Standardbred Horse breeders were holding a sale in the arena.

Finally a wheelbarrow of "ground" from the site of the new building was wheeled into the main exhibition building and dumped with great ceremony onto a tarpaulin by the Governor David Lawrence and Secretary of Agriculture, William L Henning The Governor then dutifully "broke ground" for the new building

Approximately 120 persons representing all phases of agriculture around the state looked on as the Governor dug in, sometimes to the tile floor of the building, to the great delight of the news photographers

Site of the new building will be on North Cameron St, just across from the Farm Show Building Arena

The building scheduled to be started immediately and ready for occupancy in July 1964 will house the main segments of the Department now located in the South Office Building on Capitol Hill, plus the laboratory of the

Meet Scheduled By State Ass'n Of Farm Co-ops

A series of seven director conferences has been scheduled for November by the Pennsylvania Association of Farmer Cooperatives, State College.

The conferences, to be held in various places across the state, will feature discussions on communication processess in cooperatives, on policy development on financial statement interpretation and "handling hot potatoes"

One of the meetings is scheduled to be held November 13 in the Dutch Town and Country Kitchen, 10 miles east of Lancaster.

The programs are scheduled to begin at 9 30 a m and adjourn at 3 p m. Participating in the various discussions and presentations will be the following.

Edward B. Voorhees, Pennsylvania Association of Farmer Cooperatives· Wallace Dunlap, Eastern States, Wil-

(Continued on Page 4)

Holstein Men Set Banquet

The annual banquet of the Lancaster County Holstein-Friesian Association will be held November 13 at Hostetter's banquet hall in Mount Joy.

The program, scheduled to get under way with the meal at 6 45 p m. will feature a roast chicken dinner.

Speaker of the evening will be Dr D L Biemesderfer of Millersville who will present his talk, "The Good Old Days".

Reservations for the banquet should be made with the committee before Tuesday, November 6. Committee members are Clyde M. Buchen, Ray Bollinger, and John K. Risser.

New Holland Fair Association Elects Directors

Six directors were elected to three-year terms Tuesday night at the annual meeting and banquet of the New Holland Farmers Day Association, Inc

(Continued on Page 8)

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average about five degrees below the normal range of 39 at night to 57 in the afternoon. Colder weather Sunday and Monday is expected to give way to milder weather by Wednesday. Rain Saturday and again Wednesday may total over a half inch.

Hunting License Is Permit

A few acts of vandalism is all it takes to make landowners post hunting. Game is a public resource and belongs to everyone, but land ownership is private Robert G Wingard, Penn State extension wildlife specialist, explains a hunting license is merely a permit to take game under certain regulation, it does not grant to hunters the right to trespass on or abuse private property

GROW HEALTHY PLANTS IN PEST FREE TOBACCO BEDS

MILLER MICO-FUME

Tobacco Bed Fumigant

proven effective for Control of Grass and Weeds, Fungi, Nematodes, Soil Insects

Application is Quick, Easy . . . Follow These Four Simple Steps

1. Prepare seed bed in usual manner.
2. Hand broadcast one 20-lb. bag of Miller Mico-Fume evenly over one tobacco bed (100 square yards).
3. Water immediately, applying 150 gallons of water.
4. At planting time . . . handrake lightly to break curst and seed as usual. Do not disturb soil deeper than 2 inches.

One application this fall will give you clean tobacco beds.

LANCASTER POULTRY CENTER

Prices Off Fractionally

Broiler prices slipped fractionally during the week at the Lancaster Poultry Center, but still remained over 17 cents.

At the November 1 auction, a total of 79,550 head of broilers in 19 lots brought prices ranging from 16 7 to 18.1 for a sale average of 17.23. The salt average for the corresponding sale a year ago was 12 38.

The high lot, 1,600 White Vantress Crosses at 9 weeks 2 days, was consigned by Robert Noll and bought by Martin Brendle. Only one lot of broilers were not sold. These, a lot of 4,000 at 8 weeks, 3 days, were bid to 17.2. The only other lot not sold was 950 Leghorn Fowl which were bid to 8.7.

The sale also moved seven lots of 7,940 pullets at prices of 24.25 to 26; three lots of 3,150 leghorn fowl brought 7.4 to 8 8, and two lots of 1,200 heavy fowl brought 16.2 to 16.3.

Four lots of roasters crossed the block at 23-23.8 and 175 capons sold for 30 cents A lot of 120 males were 8 8.

The complete sale offered 98,935 head in 38 lots and sold 93,985 head in 36 lots

The complete sale report follows with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

● Delmarva

Heavier Birds In Most Demand

Live prices advanced more than ¼ cent with a good demand for the light offerings in Delmarva during the 24 hour period ending 10.30 Friday morning.

Heavier birds were on the high side of the price range with purchases at farms ranging from 16.5 to 17 8 on 746,100 head including 424,700 head purchased at Thursday's auction at Shelbyville, Del About half the sales were at 16 5 to 16 9.

Ready to cook demand improved slightly to a fair position in some instances with demand spotty and mostly slow.

Estimated slaughter by Eastern Shore Processors for the week end was 685,000 head compared to the 623,000 head last week end.

The Delmarva broiler-feed ratio for the week ending Oct 26 was steady with the previous week at 3 6 Broilers averaged 16.94 and mash cost the grower $94 06 per ton.

TREND: Demand improved for all grades with a considerably more active call for top whites

Copyrighted 1962 By Urner-Barry Co.

● Fluid Milk

Supply Varied; Demand Good

Fluid milk production throughout the nation varied with the Northeast and West coast sections showing a generally slight decline while other areas noted receipts steady to slightly increased.

Offerings in the Southeast were light and some fluid supplies imported from outside the area

Bottling demand at major terminal areas reported fairly good with nearby supplies generally sufficient for needs Surplus over bottling demands absorbed into manufacturing channels

Wholesale selling price for bottling quality milk in the New York area ranged $5 3(to $5 40 per 40 quart unit.

Dairy cows have a high requirement for nutrients immediately after freshening, reminds Richard S Adams, extension dairy specialist at Penn State Place them on full-grain feeding as soon as possible after freshening.

From Where We Stand . . .

Change And Resistance To Change

Change is inevitable but resistance to change appears to almost as inevitable.

Two missives came across the editor's desk this week showing once again just how slowly people accept changes.

The opening sentence of a news article from the federal Soil Conservation Service says, "Nearly two million farmers have switched to conservation farming during the past 25 years, but few of them did it all at once."

Now — without doing too much research on the subject — we would venture to guess that a lot more than two million NEW farmers have gone into the business in the past 25 years, and these young farmers have grown up during the time when soil conservation was not a wholly new kind of program Most of them have seen the obvious benefits of using the soil wisely. Most of them had the opportunity to compare soil wasting principles with soil saving programs before they ever went on a farm of their own.

Why then, have not more than two million farmers put these programs in force on their lands? Why have so many new farmers, who should have forward-looking minds, continued in the old, wasteful farming methods, which might have been good enough when there was more land than we could explore, but which are woefully inadequate in these days when population continues to cover more and more of our acres with roofs for dwellings and macadam for driveways.

Not all the practices tried in the early days of the Soil Conservation Service were found to be 100 per cent acceptable as a means of combating erosion, but many of the original principals of soil management are still in widespread use on farms today. Their value has been demonstrated time after time and in all parts of the country.

Why, then, are farmers so slow to accept these proven methods of conserving our precious natural resources

The other article mentioned earlier has to do with something entirely foreign to soil conservation, but points up the resistance to change just as surely.

The United States Department of Agriculture has finally altered a long-standing regulation to allow the use of smoke flavorings and artificial smoke flavorings in the processing of certain Federally inspected meat products.

We know farmer-butchers who have used smoke flavoring in meats for years Of course, these meats were for their own consumption and never went into the channels of trade. To many men and women who grew up on farms a few years ago, sausage just was not sausage without a liberal soaking in "liquid smoke".

Now the USDA has decided that "smoke flavorings consist of the safe, soluble ingredients in smoke."

And all through the years that farmers were adding smoke flavoring to certain meats, the regulations said meats could be flavored only from exposure to smoke from burning hardwood or hardwood sawdust.

Well, changes march on to become part of the past and new things continue to be part of the present and future. That much of life, at least, is certain.

At least that's how it looks from where we stand.

★ ★ ★ ★

As We Have Said

All of us like the chance to say "I told you so" once in a while.

Recently a statement came from the American Medical Association which exploded a highly popular myth among the food faddists.

The statement said, in part, "Scientific reports linking Cholesterol and heart attacks have touched off a new food fad among do-it-yourself Americans But dieters who believe they can cut down their blood cholesterol without medical supervision are in for a rude awakening It can't be done. It could even be dangerous to try . . ."

" . . the elimination of certain foods of proven nutritional value could be detrimental to health . . ."

"The carefully calculated diets used in medical research to lower cholesterol actually are not yet of practical importance to the general public."

"It is for these reasons that neither the Food and Nutrition Board of the National Research Council nor the AMA Council on Foods and Nutrition has recognized the need for modification of dietary fat for the general public."

"The anti-fat, anti-cholesterol fad is not just foolish and futile, however It also carries some risk"

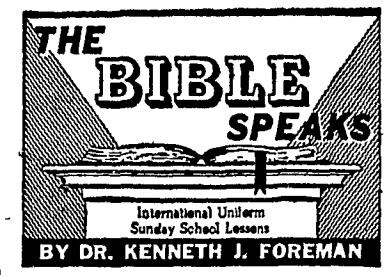
Now for the "I told you so" part.

We have been saying editorially and verbally for quite a long time that indiscriminate cutbacks in the intake of good, wholesome, nourishing foods could have more harmful effects than good ones

When certain foods are dropped from the diet, others must be substituted to make up for the lack of nutrients which the body has become accustomed to using All too often these added foods tend to lay fat on the body and compound the problem.

Well, it is gratifying to know that such an august body as the American Medical Association has finally realized the truth of a principle we have been expounding for such a long time. It makes us feel just like the oracle at Delphi.

At least that's how it looks from where we stand.



Bible Material: Psalm 19:7-11; 119 33-40; Acts 8 26-38; II Timothy 3.14-17; II Peter 1:16-21.
Devotional Reading: Psalm 19:7-14.

The Bible

Lesson for November 4, 1962

WHY the Bible? Some one might think that the Christian religion has a Bible just to keep up with the procession; for every religion in the world that has as many as a million members, has a Bible of some kind, and Christianity would be very odd if it did not. But this is not the reason we have a Bible. Is this the reason—that God can speak to man only in a written Word? Not at all. Did you ever stop to think that the whole Bible was written by persons who did not have a whole Bible? In fact, a great deal of the Bible is devoted to accounts of how God has been found in other ways as well as in the Bible. Is the reason for the Bible our need of a book of rules? No, the Bible itself does contain a few rules, but nearly every page of it is something else besides rules.

Dr. Foreman

Inspired

One reason the church cherishes the Bible is because we believe it to be inspired by God himself. This does not mean that God dictated the various books of the Bible, certainly not in English. What we do mean is that God was at work in the entire process by which the Bible has come down to us. You would cherish every letter of one you love; if your loved one was (for instance) a teacher of art, you would no doubt be glad to have pictures or sculpture done by her pupils. Perhaps your friend the teacher did not paint this picture herself, but you can tell it must have been done by one of her pupils. "It looks like her," you say. In the same way, God did not hold the pen for the writers of the Bible; but persons who have assuredly known God, have through the ages recognized the unmistakable marks of God's thought and action here. It is as difficult to "prove" the inspiration of Scripture as to prove that Mozart was a great musician. But both the Bible and the music can be studied. Out of the study comes appreciation, and out of the appreciation grows the conviction of inspiration.

You can put up a shack on desert sands or at the edge of the swamp. But if what you want to erect is a skyscraper or a cathedral, you have to look for solid rock foundations.

So when you are building a life, as Jesus said, you need to build it on a rock, not on sand. We feel the need of a court of last resort, a Judge above all judges. We need an accurate compass, we need a dependable light, a map with roads plainly marked. Now the Bible is all of these things, and people who have discovered its value have used such words as these about it. For the Protestant Christian of every kind, in spite of all our smaller or greater differences, the Bible stands as the supreme authority, even above the church. We do not find codes of rules here; we find living men and women who had authentically known God. In their life-experiences and in their reflections and conclusions, we find again the will of God for ourselves.

Some treasured heirlooms are valued highly because they are irreplaceable. So the Bible is invaluable, because it is unique. Most books answer some questions, the Bible answers the central questions. The Bible gives us the answers we do not find elsewhere. The Bible speaks to our most agonized questionings, our most insatiable quests. What is my destiny, as a human being? Am I a kind of accident, along with other human beings, or are we all part of the plan of God? How can I, poor, sick as I am, come to terms with the high God? What is God like? What can I believe about Him, and what does he want me to do? When I come to the inevitable end of this life, and face the last dark doorway, the last toll-gate, what lies beyond? When I stand at the graveside of a loved one, must I stand forever alone? When I look into the vast reaches of space to the galaxies receding ever beyond our reach, do I find there only mindless energy or do I dare to see above all, above all, infinite and eternal love? The Bible and the Bible alone gives us the answers to such questions.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Exercise Milking Herd

Now that winter is just around the corner and milking herds are being kept in at night, the cows should be turned out for exercise at least once a day, when out the cows should be observed for heat periods, lameness, or other illness The time and effort should be rewarded with a thriftier herd and increased production

To Check For Internal Parasites

Many cattle feeders are feeding too many stomach worms in their beef cattle as well as young dairy animals These internal parasites will reduce gains and increase feeds costs Producers are urged to consult their local veterinarian to determine the extent and kind of worm infestations, several types of treatments will eradicate the worms and give more profitable returns.

To Spray For Crop Insect Control

The deadline for spraying alfalfa and clover fields for the control of spittle bugs and alfalfa weevil is November 15th, both of the recommended materials, dieldrin and heptachlor, should not be applied after this deadline Growers and custom spray operators are urged to comply with this deadline for best results

To Practice Strict Sanitation Measures

The disease control program in any livestock or poultry operation should include strict regulations concerning visitors, newly-purchased animals, and owner visits to other herds or public places Service men who go from farm to farm should be extremely careful about entering buildings at other places without a thorough disinfectant operation Owners should not wear the same shoes or boots at home as they do at sales barns stock yards, or in other livestock or poultry operations, unless thoroughly disinfected.

New Holland 4-H Capon Club Has Roundup

A fourteen year old girl made a clean sweep of the New Holland 4-H Capon club Tuesday night at the New Holland American Legion Home.

Miss Janet Groff, the daughter of Mr. and Mrs. Melvin Groff, 391 L. Main Street, Bareville, won her second consecutive championship at the roundup sponsored by the New Holland Kiwanis club She had high score in total project book points as well as her three-bird exhibit

Reserve titlest in the competition was another girl, Karen High, daughter of Mr. and Mrs. Harvey High, Bareville. Miss High made her win with a first-year project in the club.

Project exhibits were purchased by members of the Kiwanis Club after the meeting Prices ranged from 65 to 70 cents a pound. Judge was Fritz Leuschner, extension poultry specialist from the Pa State University

Other winners in the exhibit phase of the contest were as follows

3, Ruth Ann High, Bareville, 4, Terry Myer, New Holland R1, 5, Sandy Smucker, Ephrata R2; 6, Ted Riker, New Holland R2.

New Holland project winners were Miss Groff and Terry Myer.

Fifty-four birds were shown at Lancaster and 18 at New Holland

Two Guernsey Herds In County Make Records

The American Guernsey Cattle Club has released figures on the high production records of two Lancaster County Guernsey herds.

The herd of Raymond and Louise Witmer, Willow Street R1, has an official record on 47 cows producing 12,225 pounds of milk and 621 pounds of butterfat. Thirteen of the cows in the herd are daughters of Golden Harvest King Cole, a bull in the stud at the Southeastern Pennsylvania Artificial Breeders Cooperative with 25 daughters on Herd Improvement Registry. The daughters have an average of 623 pounds of butterfat on a 305 day mature equivalent basis.

Harry S. Mumma, Manheim R1, had 35 registered Guernseys on the HIR program with 526 pounds of butterfat in 10,801 pounds of milk. The records include 12 daughters of Llan Fair Resolute King, also in the SPABC stud. His 19 daughters in HIR testing have an average of 480 pounds of butterfat.

Last year, the Witmer herd with 596 pounds of butterfat ranked in the first ten Guernsey herds in the nation.

Letters To The Editor

Editor, Lancaster Farming
Dear Mr. Owen:

I read your editorial about the kitchen stove I do agree about the old stove, but the new also has its advantages . children can use it. When I came home the other day, Mary had mixed the "Woopy Pies", Danny (age 9) was baking them and Sam (age 7) was putting the icing between. They work that way quite often and never start with a mix as so many recipes seem to do And the other Sunday Mary made a Stacked Cake — did you ever hear of that?

I like the coverage you gave Mary Jane Herr It is nice when the papers recognize ability as well as delinquency And you did the (Solanco Fair) Barbecue up fine. Altogether I would say your paper is improving all the time .

I also liked the editorial about the dairymen I suppose you know lots of them won't even drink their own milk and are too tight to buy butter

This should do for a while; I am just waiting now for something I don't agree with.

Mrs Grayson M. Cooper,
Peach Bottom.

(Ed. Note We certainly do know about Stacked Cake. We practically cut our first teeth on Stacked Cake and good, rich cream. Look for an editorial soon on the glories of that old mountain delicacy.)

Are You Using This Profit Making Tip?

Poultrymen are getting BETTER PERFORMANCE when they DEBEAK and VACCINATE at 10 DAYS of AGE

D. E. Horn & Co. was the first to develop and use this service in this area. Now more and more poultrymen are debeaking and vaccinating their baby chicks in this manner.

THE ADVANTAGES ARE:

1. Less stress on the day old chick
2. Less early mortality
3. Better vaccination reaction and protection
4. Debeaking lasts longer (less picked birds at market time)

A service crew debeaking and vaccinating a Hornco fed flock at 10 Days of age.

YOU CAN DEPEND ON HORNCO FEEDS

TO GIVE YOU NEW AND BETTER SERVICES

A THREE STORY OFFICE FRONTING ON Cameron Street, Harrisburg, just across from the Farm Show Arena, will look like this artist's drawing when it is finished in 1964. The building, with green houses and laboratory to the rear will house the Pennsylvania State Department of Agriculture. Ground breaking ceremonies were held this week and construction is scheduled to begin immediately.

● Ground Braking

(Continued from Page 1)

Bureau of Foods and Chemistry, and two other separate agencies, The Penna. Milk Control Commission and the State Harness Racing Commission. An additional facility will be the adjacent greenhouses for plant pest control work and seed certification by the Bureau of Plant Industry.

At the ceremonies this week, Governor Lawrence said, "It seems highly important to me that this Department and he Farm Show Building complex should be closely associated with each other, physically, It will make administration of Department affairs far easier and it will result in a far greater Pennsylvania Farm Show than ever before in history."

The $2,968,000 structure is being built for the General State Authority by Ritter Brothers, Inc, Harrisburg

Ground-clearing activity already has been completed Trees, brush and several vacant farm buildings were bulldozed away last week The adjacent egglaying test facilities were reorganized to permit razing of one building used as an office and egg room

The four-story office section of the new building will front 211 feet on North Cameron Street. The laboratory area will extend back more than 300 feet to the east.

State Agriculture Secretary William L Henning said he welcomed the new structure because it "will symbolize our modernizing agriculture and will give us up-to-date facilities for a wide range of consumer services."

Other speakers included John L Lynam, executive director of GSA; Ivan McKeever of the federal Soil Conservation Service; Dean L. E. Jackson of the College of Agriculture, Pennsylvania State University, Donald V Seipt, Keystone Farms, Easton; and the Rev Donald R. Davis, pastor of Upper Spruce Creek Presbyterian Church in Centre County.

A representative of the contractor said Tuesday, he felt certain the date of August 1964 could be beaten by several months.

Grassland Council Sponsors Seed Improvement Meeting, Hay Show

HERSHEY — The Pennsylvania Grassland Council, co-sponsor of the first National Grassland Field Days here in August, will return to Hershey Nov. 7 for a special program in conjunction with the 44th convention of the International Crop Improvement Association, Dr. John E. Baylor, president, said today.

Baylor, forage crops extension specialist at Penn State University named four speakers for a session starting at 1:30 p.m. — Robert Dye, Yakima, Wash., president of the Washington Crop Improvement Association, Drs. Guy W. McKee and John B. Washko, research agronomists at Penn State, and Dr. Dayton L. Klingman, Washington, D. C., leader, weed investigations, U S. Department of Agriculture.

Dye will report on forage seed production in his state. McKee and Washko will tell how to achieve successful seedling establishment. Klingman will deal with control of weeds in forage — at seeding time and in established stands.

Eighteen speakers — public officials, regulatory agents, researchers and industry leaders have been named to address the convention of the International Crop Improvement Association.

Included are two state secretaries of agriculture, Dr. William L Henning, Pennsylvania, and Phillip Alampi, New Jersey. Dr Henning will address a Pennsylvania breakfast the first morning and will speak again at the convention banquet Secretary Alampi will talk on adjustments in public relations as part of a seed certification panel presentation geared to changes in agriculture.

At a concurrent business session, ICIA committees will report on general certification, seed stocks, legislation and by-laws, pathological standards, information and cooperation, finance, certified seed promotion, ICIA history, and honorary membership.

The convention, for delegates of seed certification agencies in the United States and Canada, will open with a Pennsylvania Breakfast, 7 a. m., Monday, Nov. 5, and close with a banquet Thursday night, Nov. 8.

HAY SHOW

On the program also will be the 1962 Southeastern Pennsylvania District Hay Show Entries will be judged beginning at 1 p m. on November 6 in the garage of the Hotel Hershey.

The convention embracing the United States and Canada, will be attended by over 300 delegates from seed certification agencies and related institutions. It will review certification and quality control standards and consider revisions in keeping with accelerated adjustments in agriculture.

4-H Capon Club Winner Is Linda Porter

The distaff side of the Lancaster County 4-H Capon club took both top prizes at the annual roundup sponsored by the Lancaster Kiwanis Club, Tuesday at the Hotel Brunswick

Miss Linda Porter, the 12 year old daughter of Mr. and Mrs. Edgar Porter, Washington Boro R1, scored a perfect 100 points in her project book and exhibited the champion trio of dressed birds to score a clean sweep of the show.

Linda is a seventh grade student at Penn Manor Junior High School, Millersville. Last week she took second year honors in the Lancaster County 4-H Entomology club roundup.

Runner up in the contest was James Hess, a first year entrant in the club. He is the son of Mr. and Mrs James Hess, and also lives at Washington Boro R1.

Fritz Leuschner, extension poultry specialist from the Pa. State University was judge.

Hosts of the meeting, members of he Kiwanis Club, purchased the exhibits following the meeting. Prices for the dressed birds ranged from 65 to 70 cents a pound.

Other placings in the exhibit phase of the contest were as follows.

3, Eric Stoner, 1051 Eden Rr , 4, Paul Brubaker, Lititz R1; 5, Henry Hershey, Lititz R1, 6, Linda Peiffer, Manheim R1; 7, Mark Stoner, 1051 Eden Rd ; 8, Gerald Hess, Washington Boro R1, 9, Jay Fisher, Manheim R1; 10, Kenneth Dombach, Manheim.

Great Slave Lake in Canada is 300 miles wide and 500 miles long.

4-H Club Steers To Be Chosen

Hereford steer calves for the Red Rose 4-H Baby Beef and Lamb Club will be up for grabs today at the New Holland Sales Stables.

Beginning at about 9 a.m. members will draw for position in the final drawing for the calves In order of the first number drawn, the members will then draw for the calf to become the project for the year.

Calves have been purchased and will be penned at the sales stables this morning After the drawing, members will take the calves home and begin the year-long task of feeding, training and grooming for the championship in next fall's shows.

Angus and Shorthorn calves will be distributed at a later date, according to County Agent, M. M. Smith.

Paul B. Zimmerman Herd Tops Red Rose DHIA Fat Average

The herd of Paul B. Zimmerman, Ephrata R1, had the highest monthly butterfat average in the Red Rose Dairy Herd Improvement Association during the month of September, according to information released this week

The Zimmerman herd of 25 registered Holsteins produced an average of 57 pounds of butterfat in 1,516 pounds of milk with a test of 3 8 per cent

Two herds finished the month with an average of 56 pounds of butterfat each. The 20 registered and grade Holstein cows in the herd of Amos B Lantz, Bareville R1, produced the 56 pounds of fat in an average of 1,425 pounds of milk with a 3.9 per cent test Amos M Lapp, Kinzers R1, milked an average of 1,377 pounds of milk with a 4 1 per cent test from each of his 24 registered Holsteins

A Holstein cow in the herd of Furry Frey, 1343 Gypsy Hill Road, Lancaster completed the high 305 day lactation record during the month The cow, Walker, produced 874 pounds of butterfat in 21,086 pounds of milk with a 4 1 per cent test.

The second high lactation record was posted by Judy, a registered Holstein cow in the herd of John S Shelly, Manheim R1. She made 849 pounds of butterfat in 21,737 pounds of milk with a 3 9 per cent test

One other cow in the association made more than 800 pounds of fat during her lactation ending during the month A grade Holstein in the herd of Melvin Nissley produced 848 pounds of butterfat in 22,091 pounds of milk with a 3 8 per cent test

Four other cows made over 750 pounds of fat; they were in the herds of Furry Fred, J. Robert Hess, Paul E. Nissley and Vincent H Hoover Sixteen other cows made between 700 and 750 pounds of fat during the year

In the herd averages, 10 other herds had 50 or more pounds of fat per cow and another 19 herds had between 45 and 49 pounds each.

Exercise Cows

Cows need exercise even in winter, says Harvey E Shaffer, Penn State extension dairy specialist Plans for taking care of cows during the winter should include an exercise lot convenient to the barn.

opment work.

Hubbard expects to be operating from Walpole by Dec.

The company will continue its local operation under Eugene Haller, who for several years has been manager of the Lancaster plant.

Hubbard has been president of the Lancaster General Hospital board and continues as a director. He is currently co-chairman of the fund-raising campaign to build a farm and home center here.

His father, Ira S. Hubbard, who celebrated his 91st birthday Saturday, founded the business. President of the firm is Wentworth Hubbard, whose father, Oliver J., retired from the post June 1.

Corn Picking Time ?

Take Advantage of Our Grain Bank and Grain Storage Program For Your Corn Harvest

● SPECIAL BENEFITS OF OUR GRAIN BANK PROGRAM

All grains stored under this program can be returned to the grower in any form of poultry or livestock feed, by using one of the various concentrate programs. There is no livestock or poultry feed that this concentrate and grain program does not cover.

There will be storage available for corn, which can be picked and shelled at harvest time, brought to the mill, dried and stored here for later use.

Faster service now available due to new bulk unloading system. Information available on custom work with new picker-sheller machines.

Every year more and more customers use the Grain Bank and find it the easiest and most economical way to handle their local grown corn.

Penn State Vet. Gets Study Grant

Dr Samuel B Guss, extension veterinarian on the staff of the Pennsylvania State University since December 1955 and well known to dairymen of Lancaster County has been given a grant of $3 000 by the National Science Foundation for research

Doctor Guss left Oct 24 for New Zealand where he will spend eight weeks in a study of sheep management for internal parasite control milking machine methods and mastitis control He will work at Massey Agricultural College Palmerston North and at the Animal Research Station Ruakura

From Jan 7 until Feb 22 1963 he will be at the University of Sydney Australia for similar study He will continue research in Germany Sweden Denmark and England from April 1 until May 24, after short visits to Indonesia Thailand India the Holy Land Egypt Greece Turkey and Yugoslavia

In his extension veterinary work Doctor Guss has devoted most of his time to work in dairy and livestock health and related problems and has worked closely with the county and statewide dairy and livestock health committees He has been particularly active in the campaign on brucellosis that resulted in certification of the State as free of that disease Recently he has been active in the new 'Crusade against Mastitis".

The Future Belongs To Those Who Prepare For It!

Egg and Poultry Producers,

Pennsylvania is on the Move!

As we delve into total comparative costs and analyze the position of the efficient, forward-looking Pennsylvania producer, his place in the industry seems stronger than many prophets of doom would have us believe.

Sure, there is expansion in some areas. Competition is very keen.

Let's consider this a challenge — for both of us.

Nowhere is there a monopoly on know-how. Nowhere else are poultrymen closer to as many big markets.

AND

Nowhere can you get Better Feed Service or Management Assistance than at Miller and Bushong.

Remember . . .

Farmers Spent Over $42 Billion For Goods in '61

UNIVERSITY PARK, PA. — Forty-two billions of dollars is a lot of money, but that's how much U S farmers spent in 1961 to buy goods and services from the rest of us and from other farmers.

Dr. Russell E. Larson, director of the Cooperative Extension Service at The Pennsylvania State University, says "Farmers are certainly some of the best customers American business has. They spent around $27 billion to buy all the different things it took to produce 1961's bumper crops — great quantities of items like tractors and fertilizer and seed and bank interest and visits from the vet.

"And," Larson continues, "the farmer and his wife spent another $15 billion for the same vast variety of things that city people buy — like TV sets, toothpaste, appendectomies, college for the kids, houses, trips to Yellowstone Park

"All of us, whether we work in a steel mill or teach school or sell groceries for a living, have a big stake in farm prosperity"

Just as other citizens, the American farmer buys a lot of just about everything, affecting most incomes in one way or another. But some goods get used up in really big amounts in the farming process — and farmers have to keep on buying them.

Although farm people make up only 8 per cent of the population, Dr. Larson reports, they buy 13 per cent of the petroleum produced in the United States — more than any other single industry; 8 per cent of the rubber — enough to have put tires on all the automobiles manufactured in this country last year, twice as much steel as the railroad industry — about 5 million tons, and more electricity than was used by the cities of Washington, D. C; Baltimore, Chicago, Boston Detroit, and Houston combined!

Farmers also buy more trucks and tractors than any other industry. They also utilize $1½ billion worth of fertilizer and lime on their fields annually.

Statistics can be dull, but Dr Larson believes, the exciting story is in what all this big farm buying power means to people everywhere in the U S.

Millions of the so-called "city" jobs depend on farming Some 6 million people are involved in providing the goods and services that farmers buy. Another 10 million work at transporting, processing, storing, and selling farm products. Their paychecks help expand American buying power all along the line.

It's estimated that 4 out of 10 jobs in private employment are related to agriculture . . they depend on the farmer's continuing to be a "big customer"

Only 8 per cent of Americans about 15 million, actually live on farms today "But," Dr. Larson says, "when you add them together with all their business partners in our economy — merchants bankers, truckers, processors wholesalers — the 'agricultural' population is far closer to 40 than 8 per cent of the nation.

Economists expect farm income to continue in 1962 at the same increased levels of last year So, there's promise of a continued steady market for goods and services — plus leeway for spending for capital investments in new farm buildings or more land for bigger operations.

Dr. Larson concludes, "Across the nation, it would be hard to find a more important customer than American agriculture"

Dairy Cows

Dairy cows should be kept in the barn on cold fall nights Udders chilled on the ground are prone to mastitis, reminds Dr S B Guss, extension veterinarian at Penn State.

Farm-City Week To Emphasize Communication

Communications is the theme of this year's Pennsylvania Farm-City Week observance set for November 15-22.

In announcing the theme State Chairman, Ralph C. Blaney of Penn State, said communications is important in the lives of both farm and city people And the better the communications are, he said, the better these two segments of our society can understand each other and their problems

To further stress the importance of communications

(Continued on Page 20)

For the Farm Wife and Family

Fresh Cranberries

By Mrs. Richard C. Spence

In the coming weeks you will find fresh cranberries featured often on your grocer's shelf. This is the time to replenish your freezer and also to try some new ways to use fresh cranberries.

Combine raisins and cranberries. Mix cornstarch and sugar. Add orange juice, vanilla and salt. Pour over cranberries and raisins. Mix thoroughly. Fill unbaked pastry shell with mixture. Arrange strips of pastry in lattice pattern over the filling. Bake in hot oven (425 degrees) for 15 minutes, reduce heat (350 degrees) and bake in moderate oven for 30 minutes. Chopped nuts may be added to filling before baking, if desired. Makes one 9 inch pie.

FRESH CRANBERRY CRUNCH

- 1 cup granulated sugar
- 1 tablespoon cornstarch
- ½ cup water
- 1 teaspoon vanilla
- Pinch of salt
- 2 cups fresh cranberries
- ½ cup seedless raisins
- 1 cup uncooked rolled oats
- 1 cup light brown sugar firmly packed
- ½ cup all purpose flour
- ½ cup butter or margarine

In saucepan mix sugar, cornstarch, water, vanilla and salt. Stir in cranberries and raisins. Bring to a boil over medium heat. Reduce heat, simmer for 5 minutes and cool slightly. Mix in oats, brown sugar and flour together. Cut in butter or margarine until crumbly mixture forms. Spread over one half over bottom of greased 8x8" pan. Spread with cooled cranberry filling. Top with remaining half of oatmeal mixture. Bake in 350 degree oven for 45 minutes. Serve warm or cold. Top each serving with vanilla ice cream, if desired. 6 to 9 servings.

CRANBERRY CREAM DESSERT SALAD

- 1 10½ ounce package miniature marshmallows (3 cups)
- 1 #2 can crushed pineapple, well drained
- 3 ounce package cream cheese
- ½ pint whipping cream
- 1 pound (4 cups) fresh cranberries, chopped

Combine ½ package (1½ cups) miniature marshmallows with well drained crushed pineapple. Break cream cheese into small pieces and mix with whipping cream and remaining ½ package (1½ cups) miniature marshmallows. Place both pineapple marshmallow mixture and marshmallow cream mixture in the refrigerator for several hours or overnight until marshmallows are well softened. Shortly before serving, beat marshmallow cream mixture until like whipped cream. Fold in the pineapple marshmallow mixture and 4 cups chopped fresh cranberries. Place in serving dish or dishes and refrigerate until served. Makes 10 to 12 servings. The ingredients for this salad can all be prepared the night before use.

PINEAPPLE COTTAGE CHEESE MOLD

- 1 package unflavored gelatine
- ¼ cup cold water
- 1 pint cottage cheese
- 1 tablespoon lemon juice
- 1 cup canned pineapple, drained and crushed
- Fresh whole cranberry sauce

Soften gelatine in cold water and dissolve over hot water. Break up cottage cheese with hand beater or electric mixer. Add pineapple, salt, lemon juice and dissolved gelatine. Pour into 1 quart mold and chill until set. Top mold with whole cranberry sauce to serve 6 to 8 servings.

CRANBERRY KITCHEN COOKIES

- ½ cup butter or margarine
- 1 cup granulated sugar
- ¾ cup brown sugar (packed)
- ¼ cup milk
- 2 tablespoons orange juice
- 1 egg
- 3 cups sifted flour
- 1 teaspoon baking powder
- ¼ teaspoon baking soda
- ½ teaspoon salt
- 1 cup chopped nuts
- 2½ cups coarsely chopped fresh cranberries

Cream butter and sugars together. Beat in orange juice and egg. Sift together flour, baking powder, baking soda and salt. Combine with creamed mixture and blend well. Stir in chopped nuts and cranberries. Drop by teaspoons onto greased cooky sheet. Bake at 375 degrees for 10 to 15 minutes. Makes about 12 dozen tea size cookies.

NOTE: 1 teaspoon orange extract may be substituted for orange juice. Milk must then be increased to ⅓ cup.

FROSTED CRANBERRIES

- 1 egg white
- ½ teaspoon water
- 1 cup fresh cranberries
- 1 cup granulated sugar

Lightly beat egg white and water together just until blended. Dip cranberries in mixture until completely coated. Roll in sugar. Let stand until dry at room temperature or in refrigerator.

Cranberries are especially good in breads and desserts.

CRANBERRY FRUIT BREAD

- 2 cups all purpose sifted flour
- 1 cup sugar
- 1½ teaspoons double acting baking powder
- ½ teaspoon soda
- 1 teaspoon salt
- ¼ cup shortening
- ¾ cup orange juice
- 1 tablespoon grated orange rind
- 1 egg, well beaten
- ½ cup chopped nuts
- 1 or 2 cups fresh cranberries, coarsely chopped

Sift together flour, sugar, baking powder, soda and salt. Cut in shortening until mixture resembles coarse corn meal. Combine orange juice and grated rind with well beaten egg. Pour all at once into dry ingredients, mixing just enough to dampen. Carefully in chopped nuts and cranberries. Spoon into greased loaf pan (9x5x3"). Spread corners and sides slightly higher than center. Bake in moderate oven 350 degrees about 1 hour — until crust is golden brown and toothpick inserted comes out clean. Remove from pan. Cool. Store overnight for easy slicing.

CRANBERRY COFFEE CAKE

- 2 cups sifted all purpose flour
- 3 teaspoons double acting baking powder
- ¾ teaspoon salt
- ½ cup sugar
- 5 tablespoons butter
- 1 egg, beaten
- ½ cup milk
- 2½ cups fresh cranberries, coarsely chopped

TOPPING

- ¼ cup all purpose flour
- ½ cup sugar
- 3 tablespoons butter

Sift flour, baking powder, salt and sugar together. Cut in butter with pastry blender until crumbly. Mix beaten egg and milk. Add to flour mixture. Stir slowly to mix, then beat until blended well. Spread batter evenly into 8x8x2" greased baking dish. Sprinkle

Cranberries

(continued from page 14)

chopped cranberries evenly over the top. For topping mix flour and sugar together. Cut in butter Sprinkle over cranberries. Bake in 375 degree oven for 30 to 35 minutes. Makes 9 coffee cake squares.

CRANBERRY MUFFINS

- ¾ cup cranberry halves
- ½ cup powdered sugar
- 2 cups flour
- 3 teaspoons baking powder
- ½ teaspoon salt
- ¼ cup sugar
- 1 egg, well beaten
- 1 cup milk
- 4 tablespoons shortening, melted

Mix cranberry halves with powdered sugar and let stand while preparing muffin mixture. Stir slowly to mix, then egg, milk and melted shortening all at once; mix until dry ingredients are dampened; do not beat. Fold in sugared cranberries Fill muffin tins ⅔ full. Bake in moderate oven 350 degrees for 20 minutes. Makes 1 dozen.

CRANBERRY GOODIN PUDDIN'

- 1 cup fresh cranberries
- ¼ cup sugar
- ¼ cup chopped walnuts or pecans
- 1 egg
- ½ cup sugar
- ½ cup flour
- ¼ cup butter or margarine, melted
- 2 tablespoons shortening, melted

Grease well an 8" pie plate. Spread cranberries over the bottom of the plate Sprinkle with ¼ cup sugar and nuts Beat egg well Add ½ cup sugar gradually and beat until thoroughly mixed. Add flour, melted butter and shortening to egg sugar mixture Beat well Pour batter over top of cranberries. Bake in a slow oven (325 degrees) for 45 minutes or until crust is golden brown. Cut like pie. Serve either warm or cold with generous scoops of vanilla ice cream.

CRANBERRY RAISIN PIE

- ¾ cup raisins
- 3 cup fresh cranberries
- 2 tablespoons cornstarch
- 1½ to 2 cups sugar
- ½ cup orange juice or water
- 1½ teaspoons vanilla
- Pinch of salt
- Pastry for 2 crust pie (9 inch)

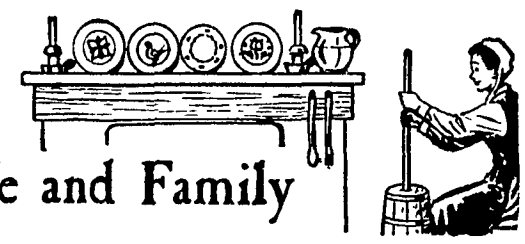
Pans Affect Cake Quality

For best results with a cake mix cake, use the size pan recommended on the package, reminds Louise Hamilton, Penn State extension foods specialist. For good heat distribution and even browning, use a mediumweight aluminum pan with a dull finish on the outside of the bottom. Prepare the pan according to directions given on the package.

Remove Milk Stain

Soak or sponge a milk stain with cold water before you try to remove it from a washable fabric, advises Mrs. Barton, Penn State extension clothing specialist. Then, using your fingers, rub a liquid detergent into the fabric.

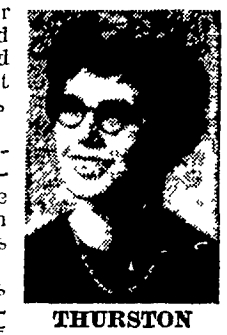
For the Farm Wife and Family



Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

Home Makers Demand Quality



THURSTON

Many fresh vegetables would find better consumer acceptance if they are handled more carefully and cooled and refrigerated adequately That's one finding from recent marketing research done in the United States Department of Agriculture

Because lettuce has no protection against bruising or water loss, it must be handled carefully and put in a cool atmosphere to keep it sound and fresh All leafy green vegetables keep their attractive crispness longer under adequate refrigeration

Another finding from the study was that bell peppers, an expensive item, showed more evidence of mishandling than most other vegetables . In some samples about forty percent of the peppers were bruised or otherwise injured

Use Sterling Every Day

Sterling silver is a big investment and it shouldn't be something you use only occasionally or when company comes. When you use silver every day, you help it to develop a soft lovely finish, often referred to as patina (patina). Rotate silver so each piece gets equal service.

Care of silver is important . . wash silver as soon as possible after each meal in hot suds, follow with a hot rinse, then dry with a soft cloth. Daily use and proper washing prevents most tarnishing.

BEST FOOD BUYS

Ad Shopping Saves Food Budgets

If you are concerned about the food budget it will pay to check the ads before you plan your shopping trip this week, advises Tom Piper, Penn State Extension Marketing Agent. You'll find most meat cuts costing the same as last week but there will be quite a variation in what different stores feature. Look for specials on beef steaks, chuck roasts, pork steaks, chops, fresh picnics and fresh hams

Pork roasts are fast becoming a seasonal good buy as increasing supplies push prices down To get the best buy for your money compare prices on a cost-per-serving basis rather than on the cost per pound A fatty, heavy boned rib end roast may be no bargain at all, even if the price is very low.

Have you noticed the coupons in newspapers and magazines for orange concentrate? The pack of frozen concentrate is 66 percent greater than last year. Processors were faced with the problem of cutting prices or advertising, so they decided to advertise Between September and November 190 million off-price coupons will be placed in newspapers magazines and Sunday supplements On top of the heavy pack to be sold this season, the latest USDA crop forecast predicts another record supply of oranges ready for harvest About one-third of the crop is usually sold fresh and the rest is processed

Many canned foods are outstanding bargains this year because of heavy supply Processors started prices off very low this year and many retailers have been passing the low prices on to shoppers as weekend features Peas, corn, tomatoes, cling peaches, fruit cocktail and pears are a few items now receiving heaviest attention.

Apples, cranberries, Emperor grapes, and citrus are leading values at the fruit counter Banana supplies are currently low resulting in higher retail prices Persimmons and kumquats are in peak supply this month and will provide you with something different.

Fresh vegetable prices are increasing steadily as supplies now come from more distant producing areas Potatoes, cauliflower, cabbage, broccoli, Brussel sprouts, celery and turnips offer greatest value this week Lettuce prices will be higher than week ago as a shift in supply areas is now taking place.

Smaller size eggs, cheese, and mushrooms are budget-priced now Consider each of these items if you are interested in economy in food buying this week.

Double Duty Sofas

Today's new sleep-sofas do such a good job of disguising their purpose that you can't tell at a glance which sofa will turn into a bed at night. Foam rubber and synthetic foams are the key to these modern sofas. Four to six inches of foam cushioning provide mattress comfort and daytime seating relaxation, point out Penn State extension home management specialists The new sleep-sofas convert easily because the foam slabs are lighter in weight than upholstery filling formerly used.

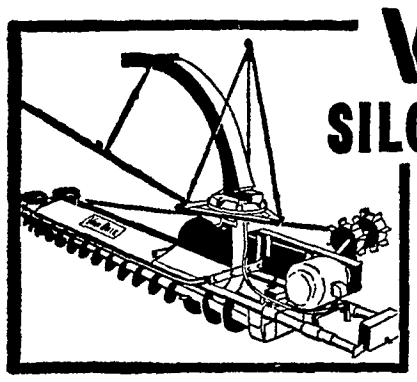
Eastern States And Wirthmore Announce Plans For A Merger

The Eastern States Farmers' Exchange and Wirthmore Feeds Inc., jointly announced today that they are discussing plans to integrate the two operations. Eastern States president, Jonathan Davis, and Wirthmore's president, Granville M. Bond, said they believe that negotiations would result in an agreement favorable to both organizations, and that the principal beneficiary would be the northeastern farmer.

The Eastern States board met last Friday, and accepted in principle the proposal that the cooperative purchase the assets and business of Wirthmore Feeds. Earlier, the Wirthmore board had agreed to proceed with negotiations.

"Major changes in our agricultural economy have brought to the fore many important developments affecting farm operation," Mr. Davis said. "With the opportunity for better and more versatile service resulting from the merging of these productions and distribution

Complete automatic feeding for DAIRY COWS and CATTLE!

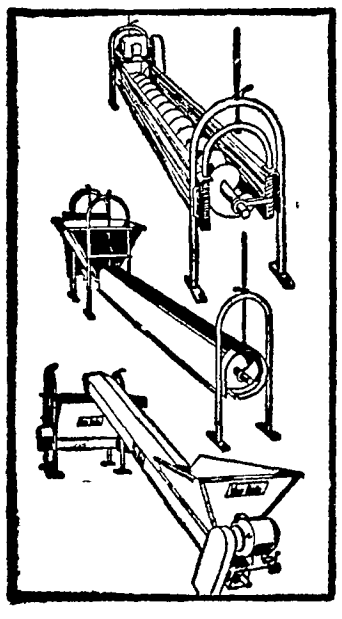


VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

units, we could offer the farmers in this area what they need to remain competitive."

"I couldn't think of a more natural marriage," Bond added. "We have the same traditions of service and dependability. Our operations fit well together. We think alike."

The Eastern States Farmers' Exchange, headquartered in West Springfield, Mass., was organized in 1918, and started its cooperative purchasing operations by assembling orders for carloads of feed among the farmers of communities in southern New England. Through its organization of farmer representatives and service centers it developed a system of feed distribution throughout the New England States, Delaware, and parts of Maryland and Pennsylvania. In addition to its feed business, Eastern States discributes fertilizers, seed, agricultural chemicals and farm supplies.

Wirthmore Feeds Inc., a wholly-owned subsidiary of Corn Products Company, is headquartered in Waltham, Mass. It was established in 1886, and has since served farmers in 17 northeast states with poultry and livestock feeds.

USDA Approves Smoke Flavoring In Some Meats

The use of smoke flavorings and artificial smoke flavorings is now permitted in the processing of certain Federally inspected meat products under an amendment to Federal Meat Inspection regulations, the U S. Department of Agriculture announced today.

"Smoke flavorings" consist of the safe, soluble ingredients in smoke "Artificial smoke flavorings" include these ingredients plus spice extracts and other flavorings.

Before this amendment, USDA regulations required that smoke flavor in meats had to come from exposure of the meat to smoke from burning hardwood or hardwood sawdust. The use of smoke flavorings or artificial smoke flavorings still is not permitted in the preparation of products such as ham, bacon, frankfurters, and bologna, which consumers normally would expect to be smoked over burning hardwood.

Products with the newly permitted flavorings are required to be plainly marked and identified with the statement "Artificial Smoke Flavoring Added" or "Smoke Flavoring Added," whichever may apply. This is to assure that the products involved are not offered for sale under any false or deceptive name

All smoke flavorings, as well as other ingredients, must be approved for safety by USDA before they can be used by Federally inspected meat processing establishments

Announcement of the proposal to change the regulations appeared in the Federal Register June 2 and again on Aug. 7 Both announcements offered 30 days for comments and views from the public and from industry.

The amendment becomes effective on publication scheduled today in the Federal Register.

fabric is the place to store silver when not in use These fabrics are filled with tiny tarnish. An occasional polishsilver particles which absorb ing with a soft cloth and a recommended silver cleaner will keep your sterling like new. But use your silver often . . . it doesn't wear out

About Molded Gelatin Desserts

Always follow directions on packages for dissolving the gelatin.

To decorate a mold, arrange pieces of fruit in the bottom and hold in place with one-fourth inch of gelatin, chill until set, then fill mold with gelatin mixture either plain or fruited. Chill until firm and ready to serve

To add fruits, chill prepared gelatin until thickened, but not set. Add up to two cups of well-drained fruit for each package of gelatin Always use canned or cooked fresh pineapple. Raw fresh pineapple will prevent the gelatin from thickening and becoming firm.

To unmold, loosen edges of desert with small pointed knife, then dip outside of the mold briefly in warm water, and shake gently after you take mold from water. Invert plate on top of mold and holding them firmly together, turn over Shake gently, then lift off mold.

To serve, spoon into dessert dishes, or cut in cubes and fill sherbet glasses, or press through a coarse sieve to make gelatin jewels and fill serving dishes.

Propagation Course Offered

Propagation is gardening's fine art. Seeds, grafts and buds, cuttings and layers, separations and divisions become new plants For more information about "Propagation of Plants" correspondence course, and other correspondence courss available, see your county agent.

Democratic Candidates Are Best Men In Local Election Campaign

(l. to r.) Dr. Richard C. Keller, Dr. Charles D. Spotts, Edison W. Osborne, Dr. William B. Gaynor, Martin J. Murphy.

"The Democratic candidates for the state legislature and the U.S. Congress from Lancaster County are the best group ever on the same ticket in any county in the United States."

This is the growing opinion of the voters throughout Lancaster County who have met John C. Pittenger, candidate for the state legislature from the City; Dr. Charles D Spotts, Dr. William B. Gaynor and Edison W. Osborne, candidates for the state legislature from the County; and Dr. Richard C. Keller, candidate for Congress.

The six Democratic candidates have been conducting a door-to-door "Meet-the-Voter" campaign which has brought them into the homes of 50,000 Lancaster County voters in the last six weeks

City assembly candidate John C. Pittenger is a former intelligence officer with the Central Intelligence Agency. A graduate of Harvard Law School, he is vice president of the Family and Children's Service and an active volunteer with the Lancaster Boys' Club. "Pitt" is a veteran of three years service with the U S Army.

Dr. Spotts

Dr. Charles D. Spotts, candidate for the General Assembly, is Chairman of the Department of Religion at Franklin and Marshall College Long active in civic and church activities, Dr. Spotts is a former school board member of Lancaster City.

A resident of Smoketown, Dr. Spotts has deep roots in Lancaster County. He is a graduate of F and M and the Lancaster Theological Seminary. His first teaching job was in a one room school house in Brecknock Township.

A part time farmer, Dr Spotts operates a ten acre beef and poultry farm in Smoketown as a hobby.

Dr and Mrs Spotts have two daughters and six grandchildren

Dr. Gaynor

Dr. William B Gaynor is the pathologist and Director of Laboratories at the Ephrata Community Hospital. As a youngster, he was a guest of the Masonic Home in Elizabethtown.

A resident of Manheim Township, Dr. Gaynor is a graduate of the Patton School, Franklin and Marshall College and Temple University Medical School. He was a combat infantryman during World War II and served for six years with the United States Public Health Service.

Bill Gaynor is a member of the AMA and other related medical societies and of the Lancaster Leiderkranz. As a candidate for the state legislature, Bill Gaynor feels that Lancaster County will benefit by having a physician's approach to current issues, especially the vital ones of health and welfare.

Ed Osborne

Edison W. Osborne is the third of the Lancaster County Democratic candidates for the Pennsylvania General Assembly. Ed is a veteran of fifty B-17 missions during World War II and is curiently one of Lancaster County's most successful dairy farmers.

Ed Osborne is the president of the Lancaster County Jersey Cattle Club and the chairman of the "5,000 heifer project." He is a school director in Fulton Township and a member of the Scholastic and Curriculum Committee of the Solanco Joint School Board

Ed and his wife, Shirley, live on their farm in Peach Bottom with their five children.

Marty Murphy

State Senate candidate, Martin J. Murphy, brings a businessman's approach to government Marty Murphy is the manager of the Storage Division of the Lancaster Leaf Tobacco Company.

A resident of Lancaster Co, Marty Murphy studied business and commercial law at the University of Baltimore He is an active member of B P O E Lodge 134, a member of the Lancaster Art Association, a former director and charter member of the Conestoga Sertoma Club and last year worked on the United Fund Campaign Drive.

An Air Force veteran, Marty was formerly in personnel work at the U S Naval Training Station in Newport, Rhode Island He has two daughters, Sheri Ann, 7, and Brenda Lee 2.

Dr. Keller

Democratic Congressional candidate Dr Richard C Keller is a teacher of American History and Government at Millersville State College. A native of Columbia borough, Dr. Keller is a graduate of Millersville State and received his doctorate at Columbia University.

No stranger to civic and county affairs, Dick Keller is the secretary of the Penn Manor Baseball League for Boys and a director of the Millersville Recreation Association. He and his wife, Frances, live in Millersville with their three sons, David 12, Brian 5, and Douglas 3.

A former Army Air Force glider pilot, Dick Keller says, "I'm running for this office because the 9th district (Lancaster and Chester Counties) has not had adequate representation."

Clark and Dilworth

The local candidates are proud to be campaigning with Richardson Dilworth, Democratic candidate for governor, and U.S. Senator Joseph S. Clark, up for reelection.

Richardson Dilworth, a fighting marine in two wars, rose in rank from private to colonel, was wounded twice in action and awarded the Purple Heart, Presidential Unit Citation and Silver Star. His dynamic record as mayor has brought national prominence to Philadelphia. Vigor, vision and vital concern for the problems of his fellow citizens have inspired Richardson Dilworth to devote the past 15 years of his life to good government As past president of the American Municipal Association and the United States Conference of Mayors, Dilworth will be an outstanding governor.

Senator Joseph S. Clark has worked closely with Presidents Eisenhower and Kennedy in their devotion to peace and disarmament under world law. He has been a vigorous supporter of health care for the elderly and is deeply interested in consumer protection. Senator Clark has also sparked the movement to end "swindle sheet" tax evasion. Joe Clark is a United States Senator of whom we can all be proud

Vote for the Best Man

Voters all over Lancaster County are this year doing what they've always said they were going to do. They're voting for the best men. They're voting Democratic.

Lancaster County Democratic Committee, John W. Hartman, Chairman

Two Million Farmers Using Conservation

Nearly two million farmers have switched to conservation farming during the past 25 years, but few of them did it all at once Instead, they made the change in easy steps — usually one at a time It's easier that way, and a lot better all around

An eight-page bulletin, just released by USDA's Soil Conservation Service, explains how farmers can put soil and water conservation to work on their farms with a maximum of fuss and bother

The bulletin illustrated with drawings, tells the farmer exactly who to contact and how to start conserving his soil and water Then it lists the second, third and fourth, and finally eight steps in all that lead to a complete conservation plan for the farm. The booklet points out that conservation farming may stem like a complicated business, and that it may involve some changes with which the farmer may not be familiar, but that the changeover can be carried out in an easy and orderly manner, if taken one step at a time

The booklet is PA-501, "Soil Conservation Is Easy If You Do It With A Plan — One Step At A Time" You can get a copy from the local Soil Conservation Service Office 439 North Duke Street, Lancaster, Pennsylvania said W. Martin Muth, Work Unit Conservationist

Hunters Caution

Don't shoot without looking, warns R G Wingard, extension wildlife specialist at Penn State Each year many people are killed or seriously injured while hunting.

BURNS CLEANER!

No smoke or odor with Texaco Fuel Chief Heating Oil. Contains Additive A-200, protects against rust and deposits.

Self Propelled Camera Inspects Drainage Lines

An experimental camera that can propel itself through underground drainage lines to locate damaged or clogged tiles has been devised by a U S Department of Agriculture engineer.

The new camera, designed as a research tool by Hollis Shull of USDA's Agricultural Research Service at Brawley, California can be used to inspect a much greater length of tile than is possible when a random tile is excavated and examined The camera can be inserted at the drainage outlet or at any point along a line where a tile is exposed by excavation

Further studies are planned using this drain-line camera as a research tool These studies may show that the device can help farmers find clogged spots in their drainage systems without the expense of excavating the lines In many cases, only a few tiles may need replacing, but farmers have to dig up entire lines to find where clogging occurs

The experimental device consists of a 35mm camera and electronic flash installed in a clear plastic tube about 3 inches in diameter and 16 inches long. The tube is mounted on two wide wheels, one at each end. A small, reversible, batter-operated motor geared to the rear wheel moves the tube through the tile line.

Controls for the camera and motor remain above ground and are connected to the tube by a cable. Using these controls, the camerman operates the camera and flash device, advances the film, and moves the tube forward or backward in the tile line. Plastic tabs on the control cable indicate the distance the camera tube has moved into the drain.

Pictures taken by the camera can show roots in drainage lines, gravel at the tile joints, and misalignment of individual tiles. In some drainage research, color photographs can be useful by showing the distinctive colors of various oxide deposits in the tiles.

● Farm - City

(Continued from Page 13)

in rural and urban life, the State Farm-City Week Committee has named leaders in communications as honorary chairmen This year's honorary chairmen include W. D. Gillen President of the Bell Telephone Company of Pennsylvania, Robert I McCracken President of the Pennsylvania Newspaper Publishers' Association, and Robert R Williams President of the Pennsylvania Association of Broadcasters

A major objective of Farm-City Week in Pennsylvania is to stress the interdependence of our farm and non-farm people This Week Blaney said offers an additional opportunity for each of these groups to become better acquainted and recognize each other's contribution to our well-being Communications is one of the media through which this can be accomplished Blaney said
